

HMKSB-15

Type : KSB Pump Seal
Replacement: Suit KSB Pumps
Temperature: -20 to +140°C
Pressure : ≤ 11 Mpa
Speed: ≤ 1500 r/min
Material : Q1,Q2,U2,T,V,M1,F,G,M

*** Product description:**

Frame oil seal is installed in the product gland, and a closed space is formed between the sealing ring. Flushing water is connected in the space, providing flushing and cooling effect for sealing ring and spring during operation to ensure stable use of mechanical seal.

*** Apply to the host**

HMKSB

*** Product features**

The container type.

*** Application :**

Thermal power generation

*** Working pump position :**

Cooling pump condensate pump, condensate pump.
