

HMWAR-05

Type: Warman Pump Seal
Temperature: $\leq 150^{\circ}\text{C}$
Pressure : $\leq 0.8\text{Mpa}$
Speed: $\leq 1100\text{rpm}$
Material : B,Q2,U2,P,E,N,V,F,G,Alfa

* Product description

The shaft diameter of this product is 115mm. Different from other shaft diameter products of the same series, this product is clamp-type transmission, which is easier and more convenient to install. After the normal assembly of mechanical seal, only the corresponding parts of the pump body can be assembled. The product can be automatically adjusted to the normal working height in the combination process of pump chamber gland, and there is no disassembly process of the limit device. The product is built in structure, which is less affected by the environment. As with most mechanical seals, flushing and circulating water must be connected before operation. Dry operation is forbidden.
