

## HMS-13

Type: Slurry Pump Seal  
Temperature: -20 to +140°C  
Pressure:  $\leq 0.8$  Mpa  
Speed:  $\leq 10$  m/s  
Material: Q1, Q2, U2, T, V, M1, F, G, M

### \*Product description:

Single end, integral container, bidirectional rotation, not affected by pump shaft adjustment. The axial dimensions of the entire component should be greater than the mounting dimensions so that the positioning block can be easily removed during loading. Mechanical seal is completely operated in medium, with strong anti-blocking ability, suitable for high concentration working conditions. Clean the water before starting the equipment, do not leave the oil seal in a dry friction state, and the water pressure should not be too high.

### \*Apply to the host

ZiGong Industrial Pump Factory

### \*Product features

Resistance to abrasion and corrosion.

### \* Application industry

Fine chemicals manufacturing.

### \*Working pump position:

Slurry pump.
