

## HMS-25

Type: Slurry Pump Seal  
Temperature: -20 to +150°C  
Pressure :  $\leq 0.2$  Mpa  
Speed:  $\leq 1800$  r/min  
Material : Q1, Q2, U2, T, V, M1, F, G, M

### \*Product description:

The series corrosion chemical standard pump mechanical seal is widely used in chemical industry, chemical fertilizer, electric power, metallurgy, papermaking, pharmaceutical, synthetic fiber and other industries, conveying corrosive medium without solid particles, or do not allow pollution medium.

### \*Apply to the host

XiangYang 525 Pump.

### \*Product features

Stable operation against crystallization and corrosion  
Diameter: 25 mm

### \*Application industry:

Thermal power generation, metallurgy, pharmaceutical and chemical fiber.

### \*Working pump position:

Slurry pump, Chemical pump.
