

HMS-29

Type: Slurry Pump Seal
 Temperature: $\leq 150^{\circ}\text{C}$
 Pressure : $\leq 1.4\text{Mpa}$
 Speed : $\leq 20\text{m/s}$
 Material : Q1,Q2,U2,T,V,M1,F,G,M

*Product description:

This series mechanical seal is the single face of big spring container type structure (its not set have pre compression components, before installing parts is still scattered, but after its fixed installation also does not need to adjust amount of compression, so yu company, is the standard container type), has a strong anti-clogging performance, corrosion resistance is superior, and for slurry medium containing solid particles can stable operation.

*Apply to the host

ShanDong Twin-Wheel Pump .

*Product features

High temperature resistance, corrosion, wear, high pressure spring received effective protection, balance structure sealing performance, long service life.

*Application industry:

Metallurgy

* Working pump position:

Slurry pump, Slag slurry pump, overflow pump bottom flow pump.
