

HMS-37

Type: Slurry Pump Seal
Temperature: $\leq 150^{\circ}\text{C}$
Pressure: $\leq 1.00\text{Mpa}$
Speed: $\leq 10\text{r/mim}$
Material : Q1,Q2,U2,T,V,M1,F,G,M

*Product description:

This series is a new type of mechanical seal designed for desulfurization peripheral pump. The sealing structure is advanced and easy to install. This series of double end face mechanical seals are made of pressure-free sintered silicon carbide, 316L, fluororubber and other materials.

*Apply to the host

Shijiazhuang industrial pump

* Product features

Static ring compensation multi-spring external contact with the media is easy to install, using a simple double end pack mechanical seal.
Diameter: 40 mm

* Application industry:

Thermal power metallurgy.

*Working pump position:

Slurry pump.
