

HMS-44

Type: Slurry Pump Seal
 Replacement: Filter Pump
 Temperature: $\leq 150^{\circ}\text{C}$
 Pressure: $\leq 0.80\text{Mpa}$
 Speed: $\leq 1500\text{r/min}$
 Material: Q1,Q2,U2,T,V,M1,F,G,M

*Product description:

Single cartridge mechanical seals HMS-44 for sludge pump, trash pump and mud pump application.

*Apply to the host:

General type factory Company

*Product features:

Single end pack type, static balance type single spring/ free rotation horizontal installation, clamping drive YWN8, 2cr13/304/316l, fluororubber/silicone rubber external circulation washing.

Diameter: 80mm

* Application industry

Alumina, metal smelting, salt chemical industry, coal chemical industry.

* Working pump position:

Chemical process pump, circulating pump, sludge/garbage pump, water and sewage pump, filter pump, mud pump.
