

HMSR-10

Type: Slurry Pump Seal
Temperature: $\leq 150^{\circ}\text{C}$
Pressure: $\leq 1.0\text{Mpa}$
Speed: $\leq 1800\text{r/min}$
Material: Q1, Q2, U2, T, V, M1, F, G, M

*Product description:

ZiGong industrial pump SR-10 cartridge mechanical seals, using moving ring, static ring, spring, auxiliary seal ring shaft sleeve, seal seat and other main parts together, so in the installation is more convenient, fast, reliable seal, simple to use, good balance, arbitrary rotation.

*Apply to the host:

ZiGong industrial pump manufacturers.

*Product features:

HQSR-10 cartridge mechanical seal series features short axial size, compact structure, convenient installation, simple use and high safety factor. It adopts single end mounted structure, durable and good stability, and is mainly applicable to gypsum slurry pump, limestone slurry pump, gypsum discharge pump, slag slurry pump, etc.

*Product parameters:

Temperature: $\leq 120^{\circ}\text{C}$
Pressure: $\leq 1.6\text{mpa}$
Solid particle content: $\leq 30\%$
Diameter: 32mm to 115mm
Suitable medium: water, oil, acid, alkali and other corrosive medium

*Scope of application:

Flue gas desulfurization, smelting, fine chemical industry, papermaking and other industries Metallurgy Food and beverage industry, Water conservancy.
